15

- 1. Polycarbonate sheets, wherein the polycarbonate is produced by the interfacial polycondensation process and the aqueous solution of an alkali salt of a bisphenol used therefore has a dissolved oxygen content of less than 150 ppb.
- 2. Use of the sheets according to claim 1 to produce glazing.
- 10 3. Glazing comprising sheets according to claim 1.
 - 4. Glazing for automobiles or for buildings or for greenhouses or for wintergardens or for bus shelters or for advertising panels or signboards or protective screens or for windows or roofing comprising sheets according to claim 1.
 - 5. Multi-layered sheet, wherein at least one layer contains the polycarbonate according to claim 1.
- 20 6. Proces for the production of the sheets according to claim 1 by extrusion.
 - 7. Process for the production of the multi-layered sheets according to claim 5 by co-extrusion.
- Multi-layered sheets according to claim 5, wherein at least one layer contains
 UV-Absorber, the concentration of the UV-Absorber in the layer being
 preferably 0.01 to 20 % by weight.
